

Isla Gold Tansy

Tanacetum vulgare 'Isla Gold'

Height: 18 inches

Spread: 24 inches

Spacing: 18 inches

Sunlight:

Hardiness Zone: 4a

Ornamental Features

Isla Gold Tansy has masses of beautiful yellow button flowers at the ends of the stems from early to late summer, which are most effective when planted in groupings. The flowers are excellent for cutting. Its attractive fragrant ferny pinnately compound leaves emerge gold in spring, turning lime green in color throughout the season. The fruit is not ornamentally significant.

Landscape Attributes

Isla Gold Tansy is an herbaceous perennial with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This plant will require occasional maintenance and upkeep, and can be pruned at anytime. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading

Isla Gold Tansy is recommended for the following landscape applications;

- Mass Planting
- General Garden Use

Planting & Growing

Isla Gold Tansy will grow to be about 18 inches tall at maturity, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years.

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
