

**Green Mountain Boxwood**  
*Buxus 'Green Mountain'*

Height: 5 feet

Spread: 4 feet

Sunlight: ○ ● ●

Hardiness Zone: 4b

**Description:**

A compact hybrid broadleaf evergreen with a pyramidal shape, makes a great accent hedge or garden detail plant, very popular and one of the hardier varieties; can grow larger if left unpruned

**Ornamental Features**

Green Mountain Boxwood is primarily valued in the landscape or garden for its decidedly oval form. It has rich green evergreen foliage. The small round leaves remain green throughout the winter.

**Landscape Attributes**

Green Mountain Boxwood is a dense multi-stemmed evergreen shrub with a shapely oval form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and can be pruned at anytime. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Green Mountain Boxwood is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use
- Topiary
- Container Planting

## Planting & Growing

Green Mountain Boxwood will grow to be about 5 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub performs well in both full sun and full shade. It does best in average conditions that are neither too wet nor too dry. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

Green Mountain Boxwood makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.

### Growing Place Choice Plants

Our Growing Place Choice plants are chosen because they are strong performers year after year, staying attractive with less maintenance when planted in the right place.
