Snow Queen Hydrangea

Hydrangea quercifolia 'Snow Queen'

Height: 6 feet

Spread: 5 feet

Sunlight: ○ ◐ ●

Hardiness Zone: 5b

Other Names: Oak Leaf Hydrangea

Description:

A phenomenally attractive shrub featuring showy upright flower spikes which fade from white to pink, interesting foliage with reliable fall color and papery bark; rather coarse in appearance, best used in groupings in a garden composition

Ornamental Features

Snow Queen Hydrangea features bold fragrant conical white flowers with pink overtones at the ends of the branches from early to mid summer. The flowers are excellent for cutting. It has dark green deciduous foliage which emerges grayish green in spring. The large fuzzy lobed leaves turn an outstanding brick red in the fall. The peeling brick red bark adds an interesting dimension to the landscape.

Landscape Attributes

Snow Queen Hydrangea is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its strikingly bold and coarse texture can be very effective in a balanced landscape composition.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Snow Queen Hydrangea is recommended for the following landscape applications;

Planting & Growing

Snow Queen Hydrangea will grow to be about 6 feet tall at maturity, with a spread of 5 feet. It tends to be a little leggy, with a typical clearance of 1 foot from the ground, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub performs well in both full sun and full shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selection of a native North American species.

Growing Place Choice Plants

Our Growing Place Choice plants are chosen because they are strong performers year after year, staying attractive with less maintenance when planted in the right place.
