

Gypsy White Baby's Breath
Gypsophila muralis 'Gypsy White'

Height: 8 inches

Spread: 10 inches

Sunlight: ☉ ●

Hardiness Zone: (annual)

Description:

This selection forms a compact, dense mound producing a constant mass of small, white flowers from early to late summer; clip lightly after blooming to promote re-bloom; attractive alone, or in mixed containers or baskets

Ornamental Features

Gypsy White Baby's Breath has masses of beautiful clusters of semi-double white star-shaped flowers with buttery yellow eyes at the ends of the stems from early to late summer, which are most effective when planted in groupings. Its grassy leaves remain green in color throughout the season.

Landscape Attributes

Gypsy White Baby's Breath is an herbaceous annual with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It has no significant negative characteristics.

Gypsy White Baby's Breath is recommended for the following landscape applications;

- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Gypsy White Baby's Breath will grow to be about 8 inches tall at maturity, with a spread of 10 inches. Its foliage tends to remain low and dense right to the ground. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant does best in full sun to partial shade. It does best in average conditions that are neither too wet nor too dry, and is very intolerant of standing water. It is not particular as to soil type, but has a definite preference for alkaline soils, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Gypsy White Baby's Breath is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
